```

Microdata:

Thanks to [Tim Bridges \(Twitter @BrowserBugs\)](#) for providing an example for a schema markup like this with microdata:

```
<body itemscope="" itemtype="https://schema.org/FAQPage">  
<main>  
<h1 itemprop="headline">My Best FAQs</h1>  
<p itemprop="description">This is a list of frequently asked question I made up.</p>  
<!-- Put the mentions brand into the question -->  
<section id="Q1" itemprop="mainEntity" itemscope="" itemtype="https://schema.org/Question">  
<h2 itemprop="name">Why does a VW Beetle have no legs?</h2>  
<div itemprop="acceptedAnswer" itemscope="" itemtype="https://schema.org/Answer"><div itemprop="text">  
<p>A VW Beetle has no legs as it's actually a car made by Volkswagen.</p>  
</div></div>  
<span itemprop="mentions" itemscope="" itemtype="https://schema.org/Brand">  
<meta itemprop="name" content="Volkswagen">  
<meta itemprop="alternateName" content="VW">  
<meta itemprop="sameAs" content="https://en.wikipedia.org/wiki/Volkswagen">  
</span>  
</section>  
<!-- Alternative puts the mentions brand into the answer as it's not mentioned in the question -->  
<section id="Q2" itemprop="mainEntity" itemscope="" itemtype="https://schema.org/Question">  
<h2 itemprop="name">What kind of car does James Bond drive in Goldfinger?</h2>  
<div itemprop="acceptedAnswer" itemscope="" itemtype="https://schema.org/Answer"><div itemprop="text">  
<p>In the 1964 film Goldfinger James Bond drives an Aston Martin DB5.</p>  
<span itemprop="mentions" itemscope="" itemtype="https://schema.org/Brand">  
<meta itemprop="name" content="Aston Martin">  
<meta itemprop="sameAs" content="https://en.wikipedia.org/wiki/Aston_Martin">  
</span>  
</div></div>  
</section>  
</main>  
</body>
```
